Professional Summary

Adaptable engineering student with strong foundations in algorithms, data structures, AI/ML concepts and computer networks. Skilled in problem-solving, optimization techniques, network protocols, and full-stack development with a focus on performance and reliability. Eager to apply technical depth in a challenging environment and continuously grow in software engineering and AI-driven domains.

Education

Artificial Intelligence and Data Science Engineering 2023 – 2027

GPA: 9.2

M.S. Ramaiah Institute of Technology, Bangalore

II PU

2023

Score: 98.67%

Mahesh PU College, Bangalore

Projects

BharatStore (Namma Kirani)

- Built an offline-first Flutter application for kirana stores to manage inventory and billing.
- Implemented POS billing with barcode scanning, retrieving, and bill history using Hive.
- Added sales analytics including daily revenue, top-selling items, and low/dead stock detection.
- Integrated authentication and cloud backup/restore using Supabase.

NewSphere

2025

- Developed an intelligent news aggregation system that fetches real-time articles from multiple REST APIs and generates AI-based summaries.
- Implemented personalization using user interaction history and preference tracking.
- Added search, filtering, and save features to improve content discovery and engagement.
- Designed a modular API integration layer to support easy addition of new news sources.

Parallel Web Crawler

- Built a multi-threaded, domain-restricted web crawler with configurable parallelism (8/16/32 workers).
- Implemented depth-limited crawling with real-time progress tracking via REST APIs.
- Extracted SEO, performance, and content-quality metrics and visualized insights using a React dashboard.
- Evaluated sequential vs parallel crawling performance to analyze throughput and latency improvements.

Technical Skills

Frontend: HTML, CSS, JavaScript, Tailwind CSS, React.js

Backend: Java, Node.js

Database: SQL, MySQL, PostgreSQL

Tools/Platforms: Postman, Git, GitHub, Firebase, Vercel
